

## Climate Change Policy

### Chularat Hospital Public Company Limited

Chularat Hospital Public Company Limited and its subsidiaries (“the Company”) are committed to addressing climate change and advancing a low-carbon society. The Company recognizes that greenhouse gas (GHG) emissions impact the environment, society, and economy, and is therefore dedicated to reducing emissions, using resources efficiently, and enhancing climate resilience to ensure long-term business sustainability and stakeholder value. The Company’s actions align with Sustainable Development Goal 13 (Climate Action) and adhere to international reporting standards and frameworks for climate-related governance and disclosure.

#### Objective:

The Company aims to achieve net-zero greenhouse gas (GHG) emissions in alignment with the Paris Agreement target of limiting global temperature rise to 1.5°C, with the goal of reaching net-zero by 2050. To support this objective, the Company establishes targets consistent with these guidelines and promotes ongoing initiatives across its operations and supply chain. This includes encouraging employees, business partners, contractors, and other stakeholders to reduce GHG emissions and to adopt renewable energy solutions, thereby contributing to the achievement of the Company’s net-zero commitment.

#### Implementation Guidelines:

The Company has established the following implementation guidelines:

1. Conduct business in compliance with applicable laws, aligning with global sustainability issues while considering local concerns in accordance with sustainable development practices.
2. Identify material sustainability issues, establish key performance indicators, and define strategies to achieve operational objectives.
3. Implement sustainable procurement practices, prioritizing the selection of raw materials, products, and services that minimize climate change impacts.
4. Promote the efficient use of energy and natural resources across the entire supply chain.

5. Develop or adopt technologies and innovations in business operations to maximize resource efficiency, reduce energy consumption, and lower overall greenhouse gas emissions.
6. Increase the proportion of renewable energy and low-carbon energy used within the Company.
7. Implement measures to promote the use of recyclable, reusable, or biodegradable plastic packaging, and select environmentally friendly packaging materials in line with circular economy principles to minimize climate impacts from waste management.
8. Support and collaborate with government agencies, academic institutions, communities, and other stakeholders in addressing climate change at both national and international levels.
9. Continuously communicate and raise awareness on climate change adaptation among employees, business partners, and stakeholders.
10. Disclose environmental performance through annual sustainability reports or other relevant disclosure channels to inform stakeholders regularly.

All executives and employees throughout the Company and its subsidiaries are responsible for implementing measures/initiatives to achieve the Company's objectives and targets. The Company will provide the necessary resources to ensure the active engagement of all personnel in the effective implementation of this policy.

The Company will regularly review this policy and continuously refine associated practices to ensure that its business operations remain fully aligned with the principles of robust and effective climate change management.
